

Dr John Jensen

Curriculum Vitae

John Jensen, PhD and Senior Researcher, is an experienced ecotoxicologist and risk assessor with experience from most types of chemicals, e.g. heavy metals, organic pollutants, pesticides and pharmaceuticals.

He is an expert on risk assessment of chemicals in the environment and has in this context been involved in numerous national and international projects in issues such as risk and hazard characterization of hazardous substances found in e.g. sewage sludge, manure or contaminated sites.

Furthermore, he has been part of the team monitoring and publishing the results from the Danish monitoring programs for heavy metals in soil.
