

## Dr Jean-Paul Lallès

### Curriculum Vitae

**Dr Jean-Paul Lallès** is biochemist, agriculture engineer, physiologist, immunologist and PhD in animal nutrition.

He is Director of Research at INRA Human Nutrition Division and Head of the Human Nutrition Research Centre West.

First, he carried out studies on protein digestion and gut allergies to plant proteins in calves. Then he moved to pig research on post-weaning gut physiology disorders. He coordinated one EU project on this topic and was partner in two others (1999-2013). After his move to INRA Human Nutrition Division in 2004, he worked on the early programming (DOHaD) concept of gut function. In 2012, he contributed to launch a new INRA research unit on gut-brain axis and nutrition in the pig model.

He has done three long stays (UK 2, US 1) and more than 100 missions abroad.

His track record includes 110 peer-reviewed publications, 50 book chapters and 170 communications to congresses.

He is Deputy-Editor of the British Journal of Nutrition for reviews.
